## SAP Simple Finance – Accounting and Controlling Step Closer Together

Janet Salmon, Chief Product Owner  
Management Accounting, SAP SE

© 2015 ERP Corp. All rights reserved.

### Introduction

- Reinventing SAP Financials
  - What changes with SAP HANA
  - New user interfaces with SAP Fiori
- Reinventing Controlling
  - From multiple transactional tables to the Universal Journal Entry
  - From accounts and cost elements to a single Chart of Accounts
  - Reinventing Profitability Analysis
- Reinventing Reporting and Planning
  - Multidimensional Reporting and Line Item Browser
  - Integrated Business Planning for Financials

## SAP Simple Finance Add-On to SAP Business Suite powered by SAP HANA

## SAP HANA Technology Innovations

|  |  |   |
|--|--|---|
|  | Multi-core architecture                    | Massively parallel execution                  |
|  | Up to 2 TB DRAM in commodity servers       | Large data sets in-memory                     |
|  | In-Memory row and column Store             | Column = Fast queries                         |
|  | Compression                                | 5 – 20x                                       |
|  | Partitioning; In-Database computing        | Analyze large data sets; Complex computations |
|  | No aggregate tables                        | Flexible modeling; No data duplication        |
|  | Real-Time replication insert only on delta | Fast data loads                               |

Used in SAP Controlling to query by column, remove totals tables and summarization levels and load line items

## New Line Item Reporting for Cost Centers, Internal Orders and Projects

**Display Actual Cost Line Items for Cost Center**

Cost Center:  **Cost Center Group:**  **Posting Date:**  **Posting Date:**

**Settings:**  **Layout:**

**Display Options:**

- ☐ Hierarchical Selection
- ☐ Start with Complete List
- ☐ Group Objects
- ☐ Database Connection
- ☐ Change Selection Panel
- ☐ Object
- ☐ Pathname Object
- ☐ Source Object

**Technical Fields:**  **Business Transaction:**

**Dynamic Selection Using Fields in ALV Variants**

New Transactions (KSB1N, KOB1N, CJ13N)

2015 | CONTROLLING

## Profitability Analysis: Aggregation of Line Items

- Where IT used to predefine summarization levels for e.g. distribution channel, sales organization and material group, now these totals can be calculated on the fly from the line items
- The same selects accelerate assessment cycles and top down distributions

## Material Ledger: New Options for Aggregation

- Material Price Analysis (CKM3) aggregates documents by inputs and outputs. New tables allow quick aggregation.
- In this context drill-down reporting (KKML0) is practical for multiple materials.

The screenshot shows two SAP interfaces. The left window is 'Material Price Analysis' (CKM3) displaying a table with columns for Material, Plant, Quantity, and Price. The right window is 'Drill-Down Reporting' (KKML0) showing a detailed table with columns for Material, Plant, Quantity, and Price, allowing for drill-down reporting.

## SAP Fiori UX

## SAP Fiori HANA Search and Navigate

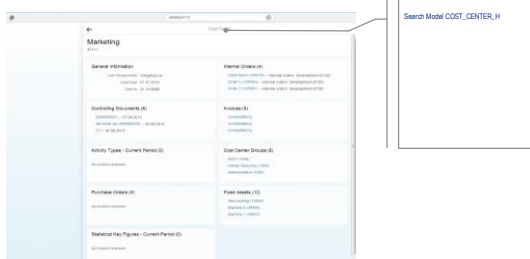

- With the combination of advanced search capabilities, new contextual navigation, and the speed of HANA we create an amazing user experience when exploring the web of business entities in the SAP Business Suite
- Advanced search capabilities such as full text, freestyle, and fuzzy search combined with a beautiful, simple, and intuitive UI
- Contextual navigation capabilities across the whole Business Suite
- Factsheets enable a consistent 360° view on business entities by enriching traditional transactional business data with additional related information such as HANA-based analytic views and further state-of-the-art services (e.g., tagging, feeds, favorites, bookmarking, ...)

## Posting Logic in SAP Simple Finance

- Merge of accounts and primary cost elements (salaries, material expenses, revenues, sales deductions,...)
- Posting lines per account and account assignment (cost center, order, WBS element, business process, CO-PA characteristic,...)
- Posting enriched by profit center, segment, functional area, and so on (derivations)
- Same granularity for all postings (no need to summarize e.g. materials, cost centers,...)

The screenshot shows the SAP Simple Finance interface with various tabs like 'Accounting', 'Cost Accounting', and 'Profitability'. It displays a table of account assignments with columns for account type, account number, and cost center. Below the table, there are sections for 'Posting Lines' and 'Account Assignments'.

## Allocations and Settlement in SAP Simple Finance

- Merge of secondary cost elements and accounts (accounts for assessment of marketing costs, direct activity allocation for machine hours, settlement of research and development costs, ...)
- Posting lines to credit sender(s) and debit receiver(s) in the universal journal
- Enriched by profit center and partner profit center, segment and partner segment, functional area and partner functional area, and so on
- Reconciliation accounts for real-time integration in new General Ledger no longer needed

## Account-Based CO-PA

- Account-based CO-PA involves extending the primary cost element for revenue and sales deductions by the relevant profitability segment.
- Any allocation will also update the relevant profitability segments. It is up to you how deep you go – either remaining e.g. at distribution channel or division or going down to the product or customer.

| Account  | Account Type | Account Description      | Account Group | Account Subgroup | Account Segment | Account Partner Segment | Account Functional Area | Account Partner Functional Area | Account Segment Partner | Account Partner Segment Partner | Account Functional Area Partner | Account Partner Functional Area Partner |

## Account-based CO-PA – Real-Time Derivations

Example: Posting of salaries and immediate assignment of the respective market segment

| G/L Account        | Cost Center                   | Market Segment | Credit  | Debit |
|--------------------|-------------------------------|----------------|---------|-------|
| Salaries and wages | 1000 (Development Financials) | HANA           | 20000 € |       |

### We get richer data faster:

- Profitability characteristics are immediately derived at the point in time of each "primary" document.
- Approach: Take all information that is available and known at this point in time. Post to a "CO-object" and fill market segment attributes in one step.
- No settlement run needed to show relevant market segment information in profitability.
- We write a market segment information to each P&L line immediately.
- Example on the left: Immediate assignment of a market segment to salary costs.

## Material Ledger: Technical Changes with SAP Simple Finance Ad-On 2.0

- Usage of Material Ledger for parallel currencies and parallel valuation purposes
- Contents of tables MLIT, MLPP, MLPPF, MLCR, MLCRF, MLCD, CKM1, BSM is now stored in ACDOCA. MLHD data is stored in BKPF
- Compatibility views V\_<TABNAME> (e.g. V\_MLIT) are provided in order to reproduce the old structures
- Access to old data in tables still possible via the views V\_<TABNAME>\_ORI (e.g. V\_MLIT\_ORI)
- MLHD, MLIT, MLPP, MLCR still keep prima nota information, in case of manual price changes or material debit/credit.
- Usage of Material Ledger for Actual Costing purpose
- MLIT, MLIT, MLPP, MLPPF, MLCR, MLCRF, MLCD are used as before SAP Simple Finance Add-On 2.0

2015 | CONTROLLING

## Types of Material Ledger

- **Multiple Valuations – Price Determination 2**
- Prices and Values shown in Material Master are selected from Universal Journal
- **Multilevel Actual Costing – Price Determination 3**
- No Change – Costing Run Needed to Update Inventory Values at Period Close

2015 | CONTROLLING

## Material Price Analysis

- **Material Price Analysis (CKM3) is widely used to analyze all factors contributing to the cost of a material.**
- Material Price Analysis initially displays data from aggregated data sets (MLCD) and then drills down to the document level (MLIT, MLPP)
- You can switch between valuations and currencies and navigate between periods in this view. In SAP Simple Finance this data is read from the universal journal.

| Material                | MC_PROD_13          | Portland Cement - 25 kg |
|-------------------------|---------------------|-------------------------|
| Valuation Type          | MLCD                | Current Stock Holding   |
| Price Determination     | Single / Multilevel |                         |
| Material Price Analysis |                     |                         |

## Integrated Business Planning for Finance

- SAP BPC 10.1, version for SAP NetWeaver, powered by SAP HANA 'embedded' in SAP Business Suite on SAP HANA
- First 'content' to use the SAP BPC 10.1 embedded model technology
- Alternative to current planning capabilities within SAP ERP FI&CO
- Allow plans to access actuals data and master data real time from SAP ERP without data replication

2015 | CONTROLLING

## Why did we Re-Invent Financial Planning ?

Planning: Functional Advantages

### Hana Driven Line Items

- Fast plan data reporting and plan/actual comparisons
- Fast plan data processing through planning functions of PAK (Planning Application Kit)

### Integrated FI and CO

- Unbeatable bottom-up and top-down planning capabilities integrating data from high level expense group level down to most detailed market segmentations
- Plan data are available at any level without the need of replication between applications

### Seamless upgrade possible:

- CO Historic Plan Data can be migrated to the new solution (currently not GL).
- Existing Plan Data processes remain unchanged (Tariff Calc., Allocations & Distributions, ...)

### Enhanced Reconciliation Capabilities

- Same granularity as in General Ledger: Every plan data record (even if it has been recorded at a higher level) is stored on company & account level.
- No distinction between G/L Accounts and Cost Elements: Reconciled by Design

2015 | CONTROLLING

## Cost and Revenue Planning

SAP delivers a set of sample XLS workbooks. You are encouraged to use them as a reference when creating your own workbooks.

---

---

## Five Key Ideas

- SAP HANA allows new paradigms to deal with big data in Controlling
- SAP Fiori includes new fact sheets and search models in Controlling
- Universal Journal merges all transactional tables (general ledger, controlling, material ledger, asset accounting)
- Accounts and Cost Elements are merged though you will still use cost elements throughout the CO configuration
- Compatibility views will ensure that your existing reports continue to run but consider implementing some of the new reports and testing the new planning options
